Spy School Team Building

Introduction

If you've ever fancied yourself as the next James Bond or Jason Bourne then our Spy School is just up your street. We have a total of 8 action packed covert missions for your team to experience. Each mission requires skill, dexterity and team work to accomplish.

What Happens ?

All budding agents are given a briefing at Spy HQ with full details of their training and the mission they must accomplish

Location

Spy School is totally mobile and can be set up anywhere in the UK or Europe. Set up time is about 3 hours and the whole activity session can be designed to last from 2 hours to a whole day. If you need help with selecting a venue then we can help as we partner a number of hotels throughout the UK.

Spy School Activities

Spy School includes up to 8 exciting and challenging activities:

- Drop Box
- Sniper Shot
- Zip wire
- Laser Maze
- Code Breakers
- Bomb Squad
- Surveillance
- Fire Power

Drop Box

All covert missions require the use of secret hiding places for documents and messages.

We supply each team with a flight case containing an array of Spy Kit including a GPS receiver and a detector.

The task is to find the Drop Boxes and collect the clues from each, they will be needed later in the day

Sniper Shot

The agents will be taught in Sniper techniques and get to assemble a high tech Sniper weapon and then fire it.

You will learn concealment techniques to blend into the background. Hit the targets accurately and earn valuable points for their team

Zip Wire

Every agent on special ops needs to be agile to carry out daring missions. In this scenario agents need to zip down our aerial runway whilst in this vantage point throw a grenade into a terrorist bunker. Agents get several dry runs before attempting the mission for real

Laser Maze

The mission is to break into a vault then negotiate the security laser beams without breaking them. Once inside the vault you will use the combination code you have obtained from a previous mission to get into the safe and retrieve vital documents, then squirm back to safety through the Laser Maze

CODE BREAKING

Code Breakers

During other missions each team of agents will have retrieved valuable coded messages.

Now it's time to decipher those coded messages using the equipment available. It's all against the clock so the pressure is on.

Bomb Squad

Agents are faced with a small flight case that has a fully armed bomb inside. The team have a limited time to defuse the bomb by using a combination dial and finally by cutting the correct two out of eight jumper cables.

Agents will receive feedback through the activity via a visual display and audio prompts.

If the mission fails then the countdown procedure starts resulting in an explosion!

Surveillance

The mission is to sneak into a Russian Commanders Field Command Post.

Once inside you will need to disarm the security camera and place a listening device.

When you have you completed the mission successfully you then have to listen in and take down vital information

Fire Power

Fire a range automatic machines guns and pistols at moving targets. Each gun is loaded with chalk pellets that explode in a white cloud of powder on impact. This is a dramatic and exciting mission with lots of noise and smoke!

Please note: No live ammunition or weapons are used in the activities to comply with current Legal and Health & Safety legislation. Weapons used are a combination of paint ball guns, replica and laser guns.

Rules of Participation

- No live ammunition or weapons are used in these activities in compliance with current Legal and Health and Safety legislation
- The weapons used are a combination of paint ball, replica and laser guns
- Suitable loose and comfortable clothing should be worn with flat soled shoes
- Participants are required to fill out a medical questionnaire declaring conditions and medications
- Participants should be of a minimum fitness and will be able to take the activities at their own pace
